BROCHURE**

VSTAR is a leader in premium off-road automotive accessories, particularly in modified body kits. Our founding team was established in 2008, and our products are designed in California. Our mission is to research, design, and produce high-end exterior and interior accessories that give your car a distinctive new identity. VSTAR's design philosophy emphasizes a cohesive overall look – rather than simply stacking on parts, we aim to preserve and deepen the beauty of the vehicle's original design language. We also pay close attention to structural details that ensure damage-free, easy installation.

We have been awarded numerous honors, including the Science and Technology Demonstration Enterprise and OEM/Dealership Group Supplier, among others. Our factory partners are equipped with skilled professionals and a comprehensive top-tier production line, covering research and design, injection molding, a dust-free paint workshop, a hardware workshop, and an assembly workshop.

Our products are compatible with most high-end car brands, and our product line includes modified body kits, running boards, decorative side steps, side skirts, hood spoilers, front and rear bumpers, hoods, fender flares, and more. Our products are sold worldwide in over 20 countries and regions, with our primary customers from Western Europe, South America, the Middle East, South Asia, East Asia, and beyond.

The Bronco's journey begins with a Spark.

"I treat it the way you'd raise a child—purposefully planned and shaped,
not just dressed up with superficial cosmetics."

— VSTAR designer

VSTAR

- The VSTAR SPARK conversion kit for the Ford Bronco stays true to the iconic design language, delivering a rugged build that's restrained yet undeniably refined. No lazy material dumps. No cluttered elements. Instead, it builds on the factory design with seamless, narrow-flare widebody fenders and a compact forward-raked hood that blend smoothly into the OEM body lines. Best of all, every component installs without cutting, drilling, or permanent modifications—preserving your Bronco's original integrity.
- The front and rear bumpers and spare tire cover receive a complete overhaul. The bumpers themselves are crafted entirely from carbon fiber and sculpted with a cyber-mecha aesthetic. Thanks to the inherent advantages of carbon fiber molding, the SPARK bumpers achieve that intricate armor-like form while standing up to the demands of hardcore off-road use. The kit also includes a full set of carbon fiber trim pieces that amplify the mecha-inspired visual impact, letting you and your Bronco dominate the trails with an even bolder, more aggressive stance.
- Paired with the factory off-road chassis, the SPARK bodywork delivers a compact, agile stance. If you're a mild-build enthusiast running stock-size tires and factory suspension, the classic exterior quietly projects an understated sophistication in the city. Hey, who doesn't love a timeless look? And if you do go deeper into chassis upgrades, SPARK transforms into something truly commanding—ready to tear across any terrain and showcase its full performance and head-turning design with nothing held back.

True commanding design is about precision in power—not exaggeration.

The SPARK hood features an armored design that is compact, agile, and meticulously refined down to every edge.

Even the smallest details reveal intent.

- Made of magnesium-aluminum alloy – strong, lightweight, takes off-road hits, and cools well.
- Hydraulic assist lets you open the hood with one hand – no struggle.
- Hood angle is calibrated for a wide, clear view of the trail ahead.
- Aggressive armored-vehicle styling gives your Bronco a tough, head-turning look.
- Simple bolt-on install – no drilling or cutting.
- Sealed design keeps mud and debris out on the trail.
- Fits 2021–2026 Ford Bronco (excluding Raptor & Bronco Sport).

Precision-molded from high-strength composite, the SPARK "Arc-Axe" Limb Riser bracket hacks through brush and branches like a battle-axe—your vanguard into the wild. Fusing hardcore off-road aesthetics with real-world utility, it stands as a defining detail on the front end of your Bronco.

- Made of high-strength composite – tough, durable, and built to last.
- Aggressive axe-blade design gives your Bronco a mean, ready-to-charge look.
- Deflects branches and trail debris away from the windshield.
- Simple bolt-on install – no drilling or cutting needed.
- Built to last – quality you can trust.
- Fits 2021–2026 Ford Bronco (excluding Raptor & Bronco Sport).
- Steel cable sold separately.

The SPARK front bumper represents a breakthrough application of full dry carbon fiber—built with substance, not shortcuts. It leaves behind the shaping limits of traditional metal bumpers, delivering proven durability and impact resistance while achieving the taut, sculptural presence of fine art. The lightweight build unlocks engine response, re-centers vehicle balance, and sharpens off-road handling. With its commanding performance and extraordinary design, SPARK projects your style on its own terms.

- Full dry carbon fiber construction with reinforced stress points.
- In extreme cases, absorbs hard impacts by fracturing, which helps protect your frame.
- Aggressive next-gen armor look – not bulky like traditional metal bumpers.
- Over 50% lighter than factory steel – less strain on your suspension, better handling.
- Simple bolt-on install – no drilling or cutting.
- Built to last – quality you can trust.
- Fits 2021-2026 Ford Bronco (excluding Raptor & Bronco Sport).
- Note: For hardcore rock crawling or extreme off-road use, we recommend a steel bumper for more affordable replacement.

Restrained, Yet Bold

SPARK is about proportion. The "Reverse Widebody" concept extends the Bronco's factory styling elements and lines while pulling the silhouette tighter—elevating overall coherence and delivering a stance that is fuller, more refined. Your Bronco emerges with the elegance of a gentleman and the rugged physique of a trailblazer—a true original in a world of off-road builds.

- Complete kit – includes SPARK fender flares, custom-molded inner liners, and matching trim.
- Sculpted design flows with factory body lines for a clean, built-in look.
- Tight flare proportions give you extra coverage without a stance that's too wide – keeps you trail-ready.
- One-piece molded alloy polymer – takes hits and bounces back.
- Simple bolt-on install – no drilling or cutting.
- Sealed design keeps mud and debris out on the trail.
- Built to last – quality you can trust.
- Fits 2021–2026 Ford Bronco (excluding Raptor & Bronco Sport).

An Original Multi-Function Spare Tire System—Solid Support, Fully Integrated

The VSTAR spare tire cover multi-function platform makes smart use of the carrier space by integrating an external tool mounting panel, storage box, and work platform into a single unit—four functions in one. Access your tools from outside the vehicle, keeping the interior clean and clutter-free while eliminating the noise of gear shifting over rough terrain. Ample storage is the foundation of any wilderness-ready rig, and even more utility awaits your discovery.

- All-in-one spare tire system – combines storage, tool mounting, spare tire carrier, and work surface.
- Includes dry carbon bracket, dry carbon composite spare tire cover, and high-mount brake light.
- Fits up to 37-inch tires.
- External mounting panel – choose metal or dry carbon surface depending on your load needs.
- Built-in storage compartment works with MOLLE gear for modular setup.
- Cover folds down into a work surface for trail-side staging.
- Drain holes let you hose it clean.
- Dry carbon composite keeps weight down so your tailgate hinges last longer.
- Works with factory rearview camera.
- Simple bolt-on install – no drilling or cutting.
- Built to last – quality you can trust.
- Fits 2021–2026 Ford Bronco (excluding Raptor & Bronco Sport).

Attitude at Every Glance

The VSTAR dry carbon mirror covers reshape the side mirrors with fluid, elegant lines—projecting a distinctly aggressive stance and an air of authority. VSTAR leaves no detail untouched in its relentless pursuit of design excellence, making these covers the natural choice for those climbing to the peak.

- Mold-formed for a precision fit with factory mirrors – nice, even gaps for a clean finished look.
- Sharp, race-inspired styling.
- Includes covers for both driver and passenger sides.
- Clear coat brings out the depth of the dry carbon weave – a premium look that beats metal and plastic.
- UV-resistant coating helps keep it clear and prevents yellowing over time.
- Simple peel-and-stick installation with 3M adhesive.
- Quality you can trust.
- Fits 2021–2026 Ford Bronco (excluding Raptor & Bronco Sport).

VSTAR

The VSTAR grille carries forward Ford's iconic six-slot design language with a deeply recessed form—disruption rooted in heritage. Its layered contours create a play of light and shadow, giving your Bronco a more sculpted, more aggressive front fascia. Enlarged intake openings aid engine cooling.

- Rugged, 3D off-road design.
- Larger intake area for better cooling.
- Uses factory mounting points and keeps your OEM grille badge in place.
- Matte black finish.
- Simple bolt-on install – no drilling or cutting.
- Works with factory front-facing camera.
- Made of injection-molded ABS.

Protection, Perfected in Form

The VSTAR skid plate draws its design from the chest armor of mythic dragons. A layered structure sculpts the metal into a powerful, muscular form—delivering rugged protection with striking aesthetics.

In VSTAR's design philosophy, even the most hidden corners reveal an untamed soul.

- Multi-layer design gives it an armored look with bold, sculpted lines – a strong, one-of-a-kind style.
- Magnesium-aluminum alloy – lightweight and strong. Handles off-road impacts and helps with heat dissipation.
- Significantly lighter than steel. Better energy absorption and thermal efficiency help protect the front axle and oil pan.
- Electrophoretic black finish – full coverage for rust resistance.
- Vented design improves airflow for better cooling.
- Bolts directly to factory mounting points for a solid fit.
- Built to last – quality you can trust.
- Fits 2021-2026 Ford Bronco (excluding Raptor & Bronco Sport).

One Kit, Two Souls

The SPARK dry carbon trim panels—mounted across the doors and SPARK fender flares—give the Bronco two entirely distinct personalities. Left bare, the vehicle stays closer to its OEM roots: an understated gentleman in a tailored suit. Applied, it shifts into armored combat mode, becoming an aggressive wilderness hunter. We leave the creative space in your hands. How the style shifts is entirely up to you.

- Full dry carbon trim pieces – exclusive to SPARK. A simple DIY upgrade.
- Precision-sanded for a snug, contoured fit.
Secured with 3M adhesive for a long-lasting hold.
- Open dry carbon design protects high-wear areas from scratches and trail rash.
- Dry carbon weave adds a custom, high-end look to your Bronco.
- Built to last – quality you can trust.
- Note: Set includes 4 pairs (8 pieces total)
 - 2 pairs fit SPARK fender flares (SPARK only),
 - 2 pairs fit factory front and rear door panels (fits all Bronco models).Sold separately as needed.
