

VSTAR

VSTAR TITAN PRODUCT BROCHURE

VSTAR is a leader in premium off-road automotive accessories, particularly in modified body kits. Our founding team was established in 2008, and our products are designed in California. Our mission is to research, design, and produce high-end exterior and interior accessories that give your car a distinctive new identity. VSTAR's design philosophy emphasizes a cohesive overall look – rather than simply stacking on parts, we aim to preserve and deepen the beauty of the vehicle's original design language. We also pay close attention to structural details that ensure damage-free, easy installation.

We have been awarded numerous honors, including the Science and Technology Demonstration Enterprise and OEM/Dealership Group Supplier, among others. Our factory partners are equipped with skilled professionals and a comprehensive top-tier production line, covering research and design, injection molding, a dust-free paint workshop, a hardware workshop, and an assembly workshop.

Our products are compatible with most high-end car brands, and our product line includes modified body kits, running boards, decorative side steps, side skirts, hood spoilers, front and rear bumpers, hoods, fender flares, and more. Our products are sold worldwide in over 20 countries and regions, with our primary customers from Western Europe, South America, the Middle East, South Asia, East Asia, and beyond.

The Rulebook, Rewritten by Titans

TITAN is a full dry carbon mobile fortress built for the very few. Dry carbon fiber spanning the bodywork is not mere decoration—it is a precise balance of performance. A complete TITAN build centers its mass toward the middle of the vehicle, unaffected by the weight of the front and rear bumpers or spare tire cover. The lightweight body unlocks more of the Bronco's power and potential. Every component is developed by an OEM-caliber design team and produced by tier-one manufacturing partners—representing the pinnacle of aftermarket R&D. TITAN's unapologetic stance belongs solely to those who demand excellence.

VSTAR

- Designed by a team with OEM-level experience – built to impress hardcore off-road enthusiasts.
- Sleek, sculpted lines meet rugged muscle – a quiet, grounded strength. The "Mobile Fortress" design language blends industrial styling with serious off-road presence.
- Wide, aggressive stance inspired by desert racing – makes a bold statement on and off the trail.
- Full dry carbon construction – extremely lightweight without giving up strength.
- All components install without cutting, drilling, or sanding – direct bolt-on to factory mounting points.
- Available in 3K carbon weave or body-color paint finish.
- Maximizes wheel arch clearance – inner liners hug the factory body. Fits up to 40-inch tires. Note: bump stop adjustment may be needed to prevent rubbing.
- Sealed to OEM specs – keeps mud and debris out on the trail.
- Rugged build – quality you can trust.
- Fits 2021-2026 Ford Bronco (excluding Raptor & Bronco Sport).

Composed. A Silent Conquest.

The TITAN hood rejects clutter and excess, with a broad, flat structure that projects the visual presence of a fortress platform. It lowers the visual center of gravity across the front end, giving the driver an unobstructed sightline and an unshakable sense of control. The balanced front stance telegraphs quiet confidence. Beneath the wide, sweeping lines, every contour and transition holds condensed strength—opening up a commanding view of the wild ahead. Where excess fades, composure remains.

- Aggressive center rise gives the hood a tall, bold look – no more bulky overhang like traditional muscle hoods.
- Full dry carbon hood molded with precision steel tooling – lighter and stronger, plus it reduces nose weight.
- Heavy-duty industrial styling on a lightweight build – every edge refined for a massive but not bulky appearance.
- Hydraulic assist means you can open the hood with one hand – effortless.
- Hood angle set for a wide, clear view of the trail ahead – no blind spots.
- Simple bolt-on install – no drilling or cutting required.
- Sealed to OEM specs – keeps mud and debris out during off-road use.
- Rugged build – quality you can trust.
- Fits 2021–2026 Ford Bronco (excluding Raptor & Bronco Sport).

Not an Upgrade. An Evolution.

The TITAN Limb Riser bracket pushes biomimicry to its extreme. Forged entirely from dry carbon fiber, its muscle-bound lines solidify along both sides of the front end—not applied as decoration, but grown from the body as horns of pure strength. When you pilot TITAN through the deep wild, what you command is a true beast.

- Dry carbon fiber limb riser brackets – strong, lightweight, and built for function.
- Thicker dry carbon construction gives you a solid, heavy-duty look and feel – not thin like standard carbon parts.
- Sculpted shape inspired by natural anatomy – flows like it's always been there.
- Precision compression-molded in high-tolerance steel tooling.
- Deflects branches away from your windshield.
- Simple bolt-on install – no drilling or cutting required.
- Fits 2021–2026 Ford Bronco (excluding Raptor & Bronco Sport).
- Steel cable sold separately.

Entrust Your Safety to Dry Carbon

The TITAN full dry carbon front and rear bumper carries a tubular design language that projects a distinct heavy-industry aesthetic. Far lighter than steel, yet uncompromising in strength—a precise balance struck between weight savings and absolute reliability. The dry carbon construction is substantial and unapologetic, breaking free from the shaping constraints of traditional metal bumpers. It delivers proven durability and impact resistance while achieving the taut, sculptural presence of fine art. The lightweight build unlocks engine response, re-centers vehicle balance, and sharpens off-road handling.

- Full dry carbon construction with multilayer reinforcement – 2.5 to 6 mm thick in key stress zones.
- Absorbs hard impacts through controlled fracturing to help protect your frame.
- Dry carbon gives you a clean, industrial look with sharp, futuristic styling.
- Modular design – replace individual sections for targeted protection and added strength.
- Multi-contour surface sheds mud fast – rinse clean with a pressure washer in seconds.
- Significantly lighter than factory steel – reduces suspension load and improves handling.
- Simple bolt-on install – no drilling or cutting required.
- Rugged build – quality you can trust.
- Fits 2021–2026 Ford Bronco (excluding Raptor & Bronco Sport).
- Includes a lightweight dry carbon winch cradle.
- Note: For hardcore rock crawling or extreme off-road use, we recommend a steel bumper for easier and more affordable replacement.

Restrained Strength

We reject crude, bloated forms and unfinished edges. The TITAN fender flares are tailored to the Bronco like a bespoke suit—tight arcs sculpt a muscular presence, while meticulous aesthetics and craftsmanship strip away the bulk. What remains is a beast beneath the suit. You don't need to introduce it to anyone. TITAN itself is the most powerful statement you can make.

- Designed for serious builders – opens up wheel well clearance for tires up to 40 inches.
- Clean, sculpted lines give it a muscular stance – classic American off-road proportions. A balanced look that's both elegant and aggressive.
- Full dry carbon construction keeps weight low while staying tough on the trail. Less weight means better handling and a more responsive feel.
- Note: Without portal axles or body cutting, suspension travel may be limited by factory body structure. Verify fitment before installation.
- Simple bolt-on install – no drilling or cutting required.
- Sealed design keeps mud and debris out on the trail.
- Rugged build – quality you can trust.
- Fits 2021–2026 Ford Bronco (excluding Raptor & Bronco Sport).

The Ritual of Footing, Elevated to Art

The TITAN side step redefines the boundaries of step design with a complex multi-tube heavy-industry form. Advanced manufacturing pushes curved tubing into precise intersections and parallels within tightly constrained space—an uncompromising shape that challenges conventional craftsmanship and answers to the most demanding aesthetic standards. The investment in design and engineering was never about cost. It's about that irreplaceable sense of ritual every time you step aboard.

- Heavy-duty steel tube construction – a rugged, industrial look with raw, mechanical style.
- Precision curved-tube fabrication – built with tight quality control.
- Built-in side- impact protection.
- Electrophoretic base coat with black powder-coat finish – full rust protection with no missed spots.
- Steel construction throughout.
- Sealed design helps keep mud and debris out on the trail.
- Durable build – quality you can trust.
- Fits 2021-2026 Ford Bronco (excluding Raptor & Bronco Sport).

An Original Multi-Function Spare Tire System—Solid Support, Fully Integrated

The VSTAR spare tire cover multi-function platform makes smart use of the carrier space by integrating an external tool mounting panel, storage box, and work platform into a single unit—four functions in one. Access your tools from outside the vehicle, keeping the interior clean and clutter-free while eliminating the noise of gear shifting over rough terrain. Ample storage is the foundation of any wilderness-ready rig, and even more utility awaits your discovery.

- All-in-one spare tire system – combines storage, tool mounting, spare tire carrier, and work surface.
- Includes dry carbon bracket, dry carbon composite spare tire cover, and high-mount brake light.
- Fits up to 37-inch tires.
- External mounting panel – choose metal or dry carbon surface depending on your load needs.
- Built-in storage compartment works with MOLLE gear for modular setup.
- Cover folds down into a work surface for trail-side staging.
- Drain holes let you hose it clean.
- Dry carbon composite keeps weight down so your tailgate hinges last longer.
- Works with factory rearview camera.
- Simple bolt-on install – no drilling or cutting.
- Built to last – quality you can trust.
- Fits 2021-2026 Ford Bronco (excluding Raptor & Bronco Sport).

Attitude at Every Glance

The VSTAR dry carbon mirror covers reshape the side mirrors with fluid, elegant lines—projecting a distinctly aggressive stance and an air of authority. VSTAR leaves no detail untouched in its relentless pursuit of design excellence, making these covers the natural choice for those climbing to the peak.

- Mold-formed for a precision fit with factory mirrors – nice, even gaps for a clean finished look.
- Sharp, race-inspired styling.
- Includes covers for both driver and passenger sides.
- Clear coat brings out the depth of the dry carbon weave – a premium look that beats metal and plastic.
- UV-resistant coating helps keep it clear and prevents yellowing over time.
- Simple peel-and-stick installation with 3M adhesive.
- Quality you can trust.
- Fits 2021-2026 Ford Bronco (excluding Raptor & Bronco Sport).

VSTAR

The VSTAR grille carries forward Ford's iconic six-slot design language with a deeply recessed form—disruption rooted in heritage. Its layered contours create a play of light and shadow, giving your Bronco a more sculpted, more aggressive front fascia. Enlarged intake openings aid engine cooling.

- Rugged, 3D off-road design.
- Larger intake area for better cooling.
- Uses factory mounting points and keeps your OEM grille badge in place.
- Matte black finish.
- Simple bolt-on install – no drilling or cutting.
- Works with factory front-facing camera.
- Made of injection-molded ABS.

Protection, Perfected in Form

The VSTAR skid plate draws its design from the chest armor of mythic dragons. A layered structure sculpts the metal into a powerful, muscular form—delivering rugged protection with striking aesthetics.

In VSTAR's design philosophy, even the most hidden corners reveal an untamed soul.

- Multi-layer design gives it an armored look with bold, sculpted lines – a strong, one-of-a-kind style.
- Magnesium-aluminum alloy – lightweight and strong. Handles off-road impacts and helps with heat dissipation.
- Significantly lighter than steel. Better energy absorption and thermal efficiency help protect the front axle and oil pan.
- Electrophoretic black finish – full coverage for rust resistance.
- Vented design improves airflow for better cooling.
- Bolts directly to factory mounting points for a solid fit.
- Built to last – quality you can trust.
- Fits 2021–2026 Ford Bronco (excluding Raptor & Bronco Sport).
